Career Objectives

- **Short-term:** Within the next year, I aspire to accumulate practical experience in the field of Business Analysis by participating in real-world projects within the company. I hope to have the opportunity to learn from experts, master analytical skills and business process management, and apply the knowledge gained to optimize business processes.
- **Long-term:** I aim to become a professional Business Analyst, capable of making significant contributions to shaping strategies and improving business processes. I aspire to develop leadership skills, strategic thinking, and continue to enhance my knowledge of technology and business to support the company in achieving critical business objectives, paving the way to become a Product Owner and Project Manager.

Project

Project: Social Network – UIT Front-end developer

- **Description:** Developed a Reddit-like social media platform where users can create posts, join communities, engage in discussions, upvote/downvote content, and interact with other users in real time. The platform includes features such as user authentication, content moderation, and personalized feeds.
- **Technology:**
 - Frontend (FE): Next.js, Bootstrap, Tailwind CSS
 - Backend (BE): C# ASP.NET, MySQL
 - Github https://github.com/HuyNguyenCode/social_network_uit
- **Responsibilities:**
 - Designed and developed a responsive UI/UX using Next.js, Bootstrap, and Tailwind CSS.
 - Created reusable components for posts, comments, upvotes/downvotes, and community pages.
 - Integrated RESTful APIs to fetch user data, posts, and comments dynamically.
 - Implemented infinite scrolling for better user experience and performance.
 - Ensured smooth user authentication and session management using JWT & cookies.
 - Developed an interactive community search and filtering system.
 - Optimized performance with lazy loading and Next.js server-side rendering (SSR).
 - Improved website accessibility, SEO, and cross-device responsiveness.
